MULTISCAN++ PK

EN-Approved Control Panel for Car Parks

The Multiscan++ PK supports a maximum of 256 detectors and has been designed with car parks in mind.

The Sensitron Multiscan++ PK is a gas detection control panel designed for use in car park monitoring and is part of our car parks line, along with the SMART P-1 and SMART P-2 fixed detectors. Compliant with EN 50545-1 standard for detection of CO and NO2 in car parks and tunnels, the Multiscan++ PK is can support up to 256 detectors with both RS485 communication loop connected, and 4-20 mA via STG/IN8-PK modules. Its powerful microprocessor enables it to conduct a comprehensive range of self-tests to identify and localise possible failures, so you can be reassured that your site it always protected from dangerous gas buildup.
