

Dräger WorkMaster Industry Gas-Tight Suit

Particularly resistant against alkaline solutions and acids. The chemical protection suit WorkMaster Industry provides reliable protection during tank and boiler cleaning, during maintenance and repair work in narrow spaces or refineries, during chemical transports, cleanup operations and many other dangerous types of work.

Gas-tight zipper

- Runs vertically down the back
- Cover flap made from suit material with hook-and-loop fastener protects the external zipper chain

Reinforced elbows (optional)

- For activities in confined spaces and containers

Reinforced knees (optional)

- For activities in confined spaces and containers

Integrated gas-tight full face mask

- The head harness rests on the head and is protected below the suit material

Ventilation system Dräger RV PT 120 L (optional)

- A connection to a compressed air hose system, a ring line or an external air supply is possible: when connected an adjustable air flow cools the suit and reduces the humidity inside. At the same time, the system ensures the breathing air supply for longer periods of use

Gas-tight safety gloves

- Easy to replace
- Attached to the suit

Gas-tight safety boots

- Easy to replace
- Attached to the suit

Benefits

Zipper on the reverse side

The one-piece chemical protection suit WorkMaster Industry, with gas-tight integrated full face mask, is designed for breathing apparatus to be worn over the protective suit (Type 1b) and protects against solid, liquid, aerosol and gaseous hazardous substances. An easy-to-maintain zipper on the reverse side provides secure protection against chemicals from the front and makes donning and removal easy. The zipper runs from the forehead over the head, continuing vertically down the back.

Integrated ventilation system

A ventilation system can be integrated into the protective suit in order to cool the body, divert moisture and significantly improve wearing comfort.

Optional knee and elbow reinforcement

The WorkMaster Industry is made of Symex, a material with high durability, high abrasion resistance and high chemical resistance. It can be optionally ordered with reinforcements at the elbows and knees.

Good maneuverability

Using a modular design, the suit can be assembled and adjusted according to the specific operating conditions. Its fitted cut enables maximum maneuverability in various job situations.

Tool less glove exchange

The protective gloves and safety boots have a chemically tight connection with the suit. The gloves can be easily exchanged without the use of tools.

For all sizes

Four different suit sizes are available (M, L, XL, XXL). Safety boots are available in sizes 43 to 50, gloves in sizes 9, 10 and 11.

System Components

D-596562-2012

Dräger HPS® 7000

The Dräger HPS® 7000 firefighter's helmet is in a class of its own, thanks to its innovative, sporty and dynamic design, ergonomic fit and components which make it a multifunctional system solution. It provides optimum protection during every operation.

ST-6185-2007

Dräger PAS® ASV

The Dräger Automatic Switch over Valve (PAS® ASV) enables the user to connect compressed air breathing apparatus to an external air supply, such as a factory ring main, and be safe in the knowledge that if the external supply were to fail, there would be a safe and uninterrupted transition to the wearer's back-up air supply.

Accessories

ST-140-2007

Dräger PT 120 L control valve

Cooling effect on the body and additional breathing air from external sources.

Accessories

Nitrile-P boots

Firefighter's boots with toecaps, provide excellent protection against penetration, cutting and abrasion. Extra comfortable, in sizes 43 to 50.

Gas-tight gloves

Made from FKM or FKM / Butyl, in sizes 9 to 11.

Related Products

Dräger CPS 7900

Tailor-made for use under extreme conditions: The gas-tight Dräger CPS 7900 provides excellent protection against industrial chemicals, biological agents, and other toxic substances. Its innovative material qualifies the CPS 7900 equally well for work in explosive areas and for handling cryogenic substances.

Related Products
