Lifetime guidelines	
Storage time (when helmet not used)	3 years from shell injection date (helmet packed in proper condition, not exposed to light, chemical or any type of pollution). Store in a proper storage bag and/or in a closed cabinet to avoid extended exposure to sunlight, cold, humidity, exhaust fumes, etc. If the helmet has been stored more than 3 years, deduct the extra storage time from the recommended helmet's service life.
Service life (in addition to the storage time)	5 years from actual starting date of use MSA recommends writing the date of first use onto a sticker (supplied with each helmet) and then sticking into the shell.This is normally the point at which service life starts
Suspension (Push-Key and Fas-Trac [®] III)	Replace when damaged or contaminated , or as required for hygienic reasons
