What does more than 80 years in portable gas detection mean? A lot of experience!

When we started developing our first mobile gas detectors – the classic Dräger-Tube® gas testers – most miners used canary birds to test the atmosphere underground on oxygen deficiency. At that time we had already recognized what life saving gas detection is all about: the precise, reliable and multifunctional measurement of all harmful gases – not only oxygen. Be it toxic or explosive, today we have the right portable detection device for (nearly) all tasks.

The application fields of our mobile gas detection devices are diverse as your daily work, no matter in which industry. Use it for personal workplace monitoring, clearance measurement of confined spaces, leakage detection, area monitoring and much more.

BROAD PORTFOLIO OF SENSORS

Our single and multi-gas detectors measure above 600 different gases and vapours. DrägerSensors® are characterised by fast response times to ease processes like clearance measurements.

EFFICIENT MAINTENANCE PROCESSES

Easy preparation for the next job: We support modern fleet management with fast and automated processes for quick test times.

QUALITY PAYS OFF

The high robustness and poison resistance as well as low cross-sensitivities are

valuable properties for investing in occupational safety. The longevity of the sensors reduce the cost of ownership. The proven Dräger-Tubes are calibration free with sustainable batch-monitoring.

A CONNECTED SYSTEM

The use of data analysis and alarm reporting from the gas detector, test station and Gas Detection Connect Cloud creates an overall system that makes work processes even more efficient and supports fast decision-making.

A FAMILY OF ITS OWN

Dräger gas detectors are a family of its own. Own them or rent them – most important is, that you use them in daily work-life, for the safety of your staff. Get now familiar with our portfolio.

Mining is the historical origin of mobile gas detection. Canary Birds were used to alarm miners on harmful oxygen deficiency.

Dräger single-gas detectors

We have the solution for your task

If the danger of toxic gases or vapours can be narrowed down to a single gas or leading substance, then single-gas measuring and warning devices are the ideal solution for personal monitoring in the workplace. They are small, robust, and ergonomic. These devices are usually attached to the work clothing near the breathing area, but do not limit the movement of workers.

D-4977-2017

Dräger Pac® 6000

- Disposable device up to two years for CO, H₂S, SO₂ or O₂*
- Robust, quick sensor response times, powerful battery

D-45500-2021

Dräger Pac® 6500

- Non-disposable device for CO, H₂S, SO₂ or O₂
- Robust, quick sensor response times, powerful battery

D-45502-2021

Dräger Pac® 8000

- Non-disposable device for special gases like NO₂, O₃ or COCl₂
- Robust, quick sensor response times, powerful battery

D-45509-2021

Dräger Pac® 8500

- Non-disposable device for hydrogencompensated CO sensor or dual sensor for H₂S/CO or O₂/CO
- Robust, quick sensor response times, powerful battery

D-7474-2019

Dräger X-am® 5100

- Robust, with a large display
- For highly reactive gases such as HF, HCl, H₂O₂ and N₂H₄
- Together with the Dräger X-zone 5500 it is also suitable for area monitoring

	Dräger Pac® 6000	Dräger Pac® 6500	Dräger Pac® 8000	Dräger Pac® 8500	Dräger X-am® 5100

Dräger multi-gas detectors

The measured response to different hazards

Personal protection, area monitoring, confined space entry permits as well as safety measurements of shafts, channels or tanks are no problem with the new devices of the Dräger X-am® family. These portable gas detection instruments deliver reliable measurements, while durable sensors designed in-house ensure maximum safety coupled with extremely low operating costs.

D-59025-2012

Dräger X-am® 2500

- 1 to 4 gas detection device
- Detection of flammable gases and vapours as well as O₂, CO, H₂S, NO₂ and SO₂
- Low weight and handy
- Useable with Dräger X-am pump for CSE

D-3409-2022

Dräger X-am® 2800

- 1 to 4 gas detection device
- Detection of flammable gases and vapours as well as O₂, CO, H₂S, NO₂ and SO₂
- Bluetooth®
- Useable with Dräger X-am pump for CSE*

D-16519-2009

Dräger X-am® 5000

- 1 to 5 gas detection device
- Ex-Tox-Ox detection of gases and organic vapours
- Useable with Dräger X-am pump for CSE and with Dräger X-zone 5500 for area monitoring

D-23637-2009

Dräger X-am® 5600

- 1 to 6 gas detection device
- Detection of explosive, flammable and toxic gases as well as vapours and oxygen
- Useable with Dräger X-am pump for CSE and with Dräger X-zone 5500 for area monitoring

D-9539-2022

Dräger X-am® 5800*

- 1 to 6 Gas detector
- IR or CatEx or PID and all XXS sensors*
- Detection of explosive, combustible and toxic gases as well as vapours and oxygen
- Bluetooth®
- Can be used with Dräger X-am pump for clearance measurement and with Dräger X-zone 5500/5800 for area monitoring*

D-11880-2016

Dräger X-am® Pump

- External pump
- Can be used with the gas detectors Dräger X-am 2500, 2800*, 5000, 5600 and 5800*
- Pump starts automatically when connected to the gas detector

* Please contact Dräger for availability.

Dräger multi-gas detectors – for clearance measurement and special measuring tasks

Clearance measurement was never this easy and convenient:
The 1 to 4 gas detector Dräger X-am® 3500 and the 1 to 7 gas detector Dräger X-am® 8000 detects toxic and flammable gases as well as vapours and oxygen all at once – either in pump or diffusion mode. Innovative signalling design and handy assistant functions ensure complete safety throughout the process and easy handling.

D-406-2018

Dräger X-am® 3500

- 1 to 4 gas detection device
- Detection of flammable gases and vapours as well as O₂, CO, H₂S, NO₂ and SO₂
- With internal pump
- Especially developed for CSE, easy switch between diffusion and pump mode

D-6521-2017

Dräger X-am® 8000

- 1 to 7 gas detection device
- Detection of toxic and combustible gases as well as vapours and oxygen
- Internal pump optional available
- Especially developed for CSE, easy switch between diffusion and pump mode
- Assistant functions and Bluetooth® available

Dräger X-pid® 9500

- Selective VOC gas detection
- For frequent testing of toxic and carcinogenic substances
- Laboratory quality results in very low concentrations
- Benzene measurement starting from 50 ppb
- No consumables per measurement

Dräger X-pid® 9500

Highlights

Target compounds (analysis mode)	Benzene, Butadiene and 44+ other VOCs
Extendable compound database	●
Total VOC measurement (seeker mode)	●

Technical data (sensor unit)

Temperature range	-10°C to 35°C
Weight	880 g (2 lb)

DrägerSensors®

Precise. Long-lasting. Proven quality

Whether electrochemical, catalytic, infrared or PID – sensors from Dräger have always been leading-edge technology worldwide. All our sensors are produced under clean room conditions and are individually tested prior to shipping. DrägerSensors have been proven worldwide under hostile ambient conditions such as in mining, on offshore drilling rigs, in refineries and in chemical plants.

DrägerSensor® XXS

- Electrochemical sensor
- Monitoring of toxic gases and lack of oxygen
- Compatible with: Dräger Pac series and all devices of the Dräger X-am family
- Measuring range: in vol.-% and ppm

D-8877-2019

DrägerSensor® XS (HF/HCl, H₂O₂, N₂H₄)

- Electrochemical sensor
- Monitoring of reactive toxic gases such as hydrogen chloride, hydrazine and hydrogen peroxide
- Compatible with Dräger X-am 5100
- Measuring range: in ppm

D-27736-2017

Dräger Catalytic Ex-Sensors

- Monitoring of flammable gases and vapours
- High poisoning resistance to silicones and H₂S
- Compatible with: Dräger X-am 2500, 5000 / X-am 3500, 8000 (CatEx 125 PR) / X-am 2800* (CatEx SR)
- Measuring range: lower explosion limit and 100 vol.-% CH₄

Dräger Infrared Sensors

- Monitoring of flammable gases and vapours and CO₂
- Ideal for measuring hydrocarbons in an inert atmosphere
- No poisoning effect due to technology
- Compatible with: Dräger X-am 5600/8000 and X-am 5800* (XD-IR series)
- Measuring range: lower explosion limit and 100 vol.-% CH₄, for CO₂ 0–5 vol.-% and 100 vol.-%

D-18891-2017

Dräger PID Sensors

- Detection of volatile organic compounds in low concentrations
- Compatible with: Dräger X-am 8000 (PID HC and PID LC ppb) – selective benzene measurement with pre-tubes possible / Dräger X-am 5800* (PID HC neo)
- Measuring range: from ppm to ppb

* Please contact Dräger for availability.

Calibration and bump testing

More efficiency in daily routine

Our calibration and bump test stations make your work easier and speed up your work processes. The Dräger X-dock® series also gives you full control over your portable Dräger gas detectors. Automatic bump tests and calibrations with reduced test gas consumption and short test duration save time and money. Comprehensive documentation and evaluations in Gas Detection Connect provide you with a clear overview.

D-248907-2020

Dräger Bump Test Station

- Function tests with test gas cylinder
- Does not need power for operation
- Dräger Pac Series and Dräger X-am 2/5X00 are supported*

D-27415-2018

Dräger X-dock® 5300/6300/6600

- Automatic bump tests and calibrations
- Reduced test gas consumption, short testing times
- Quick test with gas supply time of under 10 seconds for most standard gases
- Available in a wide variety of versions
- Dräger Pac and Dräger X-am series are supported*
- Stores data; more detailed data via Dräger Gas Detection Connect

Dräger-Tubes® / MicroTubes

Measuring accuracy with long tradition

For over eight decades, Dräger has been the leading supplier to perfect the ‚laboratory behind glass‘. Dräger Tubes® detect gases, vapours and aerosols quickly and economically. The new Dräger X-act® 7000 analysis system consisting of Dräger MicroTubes and an analyser enables precise gas measurement in the lower ppb range. The handling is very simple: insert the Dräger MicroTubes, start the measurement and read the result.

ST-36-2001

Dräger Short-term Tubes

- Gas detection of more than 500 different gases
- Tubes have already been calibrated
- Can be used with Dräger-Tube® pump accuro and X-act 5000 Basic

ST-350-2004

Dräger Diffusion Tubes

- No pump required
- Diffusion process transports the contaminant molecules

ST-376-2004

Dräger Sampling Tubes

- Analysis of the sample in a laboratory
- Measurement of complex compounds and mixtures of substances possible

D-0180-2020

Dräger X-act® 5000 Basic

- Automatic tube pump
- For a high number of strokes, ideal for sampling tubes
- Display for clear readability of tube information
- Can be used in explosive areas

ST-2436-2003

Dräger accuro®

- Manual tube pump
- For spot measurements
- Integrated stroke counter
- Easy to operate with one hand
- Can be used in explosive areas

D-13188-2019

D-53881-2019

Dräger X-act® 7000

- MicroTubes and analyser
- Lab quality measurement in ppb range
- Easy to use; pre-calibrated MicroTubes
- With coupler and X-am pump suitable for CSE

**Dräger
X-act® 7000**

Highlights

Dräger Cloud Solutions

Asset Management and Live Monitoring

With the future-proof, cloud-based software solution Dräger Gas Detection Connect, you can efficiently manage your equipment and increase your safety in the working environment. The connected Dräger X-dock test station automatically stores all test and device data in the central cloud backend. With the Dräger Pac® and Dräger X-am® 2800 devices connected via Bluetooth, locations, live data as well as alarms can be forwarded, displayed and stored directly to Dräger Gas Detection Connect.

D-57389-2023

- Dräger Gas Detection Connect**
- Software Solution
 - Asset Management & Live Monitoring
 - Data exchange via cloud backend
 - Increased efficiency and safety

D-40470-2021

Dräger
Gas Detection Connect

Highlights

Software-as-a-Service (SaaS) System

Live data transmission of device data and alarms via a smartphone app to the cloud backend, direct data transmission from the test station X-dock, data availability regardless of time and location

Application area

Testing, documenting and storing gas detection devices and their data, monitoring measured values and persons in hazardous areas

Technical Data

Components

Web application (access via browser), smartphone app, cloud backend

Devices for Live Monitoring

Dräger X-dock, Dräger Pac 6500, 8000, 8500, X-am 2800

Installation

No installation of the software necessary

Supported browser

Google Chrome

Supported App Stores

iTunes Store (IOS), Google PlayStore (Android)

Backend

Microsoft Azure Cloud

Encryption

Dräger software solutions

Analysis and documentation of data

With software from Dräger you get a deep insight into your measurement results from portable gas detectors and Dräger tubes. These can be specifically evaluated, analysed and archived. In addition, you are optimally supported in the configuration and maintenance of your devices as well as the training of users.

D-35437-2015

Dräger CC-Vision Basic

- Software for professional configuration and calibration
- Documentation of calibration results
- Useable with Dräger Pac family, X-am series, X-zone 5X00 and X-act 7000
- Free of charge

D-35438-2015

Dräger GasVision

- Data analysis software for data loggers
- Regards real time measurements
- Within the Dräger Pac and X-am series

D-18313-2016

D-8146-2019

Dräger Gas Detection Training App

- Supports realistic training and instruction
- Compatible with Pac® and X-am® series
- For IOS and Android
- Free of charge

DGT-1133-2017

Dräger Tubes App

- Record, archive and evaluate tube measurements
- Forwarding of data possible
- For IOS and Android
- Free of charge

Dräger Services

Added value for daily business

Different service areas for added value – several reasons to go with us. You'll get to know our unique capabilities well before your buying decision and we'll stay by your side over the whole service lifecycle of your Dräger products. That's our promise to you. Just try it out:

Product Service – versatile, far ahead and affordable

One product service offer fits all? Far from it! Our product service is more than just a manufacturer offer to maintain your products. We have a wide portfolio of contract options, with part or full maintenance agreements. So it's up to you to decide how much support you need.

Our differentiated product service portfolio for the safety segments applies to your budget situation and the legal compliances that must be met in your business. Our product service offers never sleep – they are always up to date.

On-site & Shutdown Safety Services – No compromises

Every shutdown and every new standard maintenance project at your site have its own safety implications. To have all those safety issues in sight is often a task your safety managers cannot bear alone. No matter how well your team works, it's always a good idea to get fresh input from the outside, even if only to help identify space for improvement.

We offer you long-term, on-site safety services as well as short-term shutdown safety services, including safety staffing, Safety Shop, Rental Robot, consultancy and CSE monitoring.

Rental Service – up to date, available and efficient

Rent instead of buy – this could be a smart option for you in some cases, like short-term high demands for safety technology during shutdowns. Or if you make a point of using safety equipment that's always state-of-the-art, such as renting the latest generation of cloud-connected gas detectors.

With more than 200,000 rental devices and 18 rental hubs all over the world our rental service meets your individual demands in a cost-effective way. Our seamless logistic network always delivers your order in time. So everything works smoothly.

Training – attentive, inclusive and forward-thinking

Our trainers are always happy to share their knowledge. Every dialogue with you, our customers, brings us forward together. Most Dräger instructors have worked in your industries for many years. So they really know what you mean when you're reporting on your work life.

Depending on the topic, we combine traditional classroom training with practical exercises, realistic simulations and web-based online elements. We carry out more than 2,400 trainings annually and have more than 600 different training topics on offer.

Dräger VOICE

The hazmat-based safety product finder

The new Dräger VOICE provides you with basic information on important hazardous substances and the related safety solutions.

YOU KNOW WHAT

You know best which hazardous substance is present in your daily work. That's why you simply type in your requested substance and Dräger VOICE supports you with vital information to more than 1,500 hazardous substances, about their physio-chemical characteristics and relevant limit values right away.

WE KNOW HOW

Based on the entered hazmat the Dräger VOICE online-tool knows how to protect you and your team properly. It recommends suitable respiratory and body protection equipment as well as appropriate gas detection solutions in real time.

EXPERT KNOWLEDGE TO GO

Dräger VOICE provides a quick navigation through our safety portfolio and works with almost any device. It is an essential tool for all people looking for expert knowledge on safe handling of hazmats. At the same time it is meant as an invitation to get in touch with Dräger, to customize the recommendation to your personal needs.

Hazmat expert knowledge for you – try it yourself!
